APPENDIX B
Canadian Environmental Assessment Act
Pre-Screening Checklist (Form 101)

Complete this appendix if the activities described in your proposal take place outside an office or a laboratory. Include activities that will take place in Canada and abroad. You may attach additional information or comments on a separate sheet. This information will be used by CFCAS to determine whether a screening is required under the *Canadian Environmental Assessment Act*. (See the *CFCAS Awards Guide*.)

		Date
Family name of applicant	Given name	Initial(s) of all given names
Answer yes (Y) or no (N) by checking off the items below.		
Y	N	ITEM
		Does any phase of the proposal involve the construction, operation, modification, decommissioning, abandonment or other undertaking in relation to a built structure that is fixed in place and not transportable?
		Please indicate whether any phase of the proposal includes the following outdoor activities:
		Takes place in a National Park or nature reserve.
		Takes place in Aboriginal lands.
		Takes place in the Yukon, Nunavut, or the Northwest Territories.
		Takes place in or within 30 metres of the right-of-way of a power-line, a natural gas line, or a railway line.
		Takes place in or within 30 metres of the high-water mark of any water body, including a canal, a reservoir, an ocean or a wetland (meaning swamp, marsh, bog, fen or other land that is covered by water during at least three consecutive months of the year). NOTE: sewage or waste treatment lagoons or mine tailings ponds are not included.
		Sampling or prospecting for ores or minerals.
		Disposal of a prescribed nuclear substance.
		Disposal of a deleterious substance into the environment (in the earth, air or water).
		Remediation of contaminated land.
		Destruction of fish (NOT fishing).
		Damaging or removal of vegetation.
		Killing or removal of migratory birds, their nests, eggs, or carcasses.
		Establishment or operation of a field camp that will be used for 200 person-days or more within a calendar year.
		Seismic surveying involving more than 50 kg of chemical explosive in a single blast; or marine or freshwater seismic surveying, if during the survey the air pressure measured at a distance of one metre from the source would be greater than 275.79 kPa (40lbs/sq in).
Are any provincial or federal authorizations, permits, or licenses required to undertake any activity for any phase of the proposal? If so, please list them below:
